2000 Analytical Review DWCCA-1890-PJL

Dear Ms. Nelson:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. During our review we noted that while the utility requested and was granted, in correspondence from the Commission dated February 11, 1999, authorization to amortize the cost of painting the water tower, there is no amortization recorded in Account 183, please explain.
2. During our review we noted that while there is \$1,030 reported in Account 690, Uncollectible Accounts on page W-5, the same amount was not deducted from the Revenues Subject to Wisconsin Remainder Assessment on line 5 of page F-4. Please note that in the future uncollectible accounts can be deducted on page F-4.
3. During our review of the Hydrants and Distribution System Valves schedule on page W 18 we noted that there are 24 fire hydrants reported as being outside the municipality. Please confirm that those hydrants are actually inside the municipality and that the 2001 annual report will be adjusted using column (e) to reclassify those hydrants from line 1 to line 2.
4. During our review we noted that according to our calculations, the amount the utility reports for public fire protection service billed per Rate Schedule F-1 in Account 463 on the Other Revenues (Water) schedule, page W-4, differs from our calculation by \$377 (see enclosed worksheet). Please provide an explanation of how the utility arrived at the number reported on line 1 of Account 463, Public Fire Protection Service on page W-4 and confirm that our method of calculation will be used in the future.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient for you to do so. Subject: 2000 analytical review

The following comments are in response to your letter dated November 28, 2001.

1. In response to your question regarding the painting of the water tower, account 183 was used as the asset account. Each year when the amortization expense was recorded, account 183 was reduced. Last year was the final year of amortization causing account 183 to become zero.
2. I will take note that future uncollectible accounts can be deducted on page F-4.
3. Yes, all the Hydrants and Distribution System Valves on page W-18 are inside the municipality, and the 2001 annual report will be adjusted using column (e) to reclassify those hydrants from line 1 to line 2.
4. I am attaching a spreadsheet we used to calculate the fire protection service. Please note that we incorrectly used all mains versus using only those 6 inch and larger. I also have a question regarding your calculation. I noted that you used all mains that are 6 inch and smaller versus all mains 6 inch and larger as the wording says on your calculation. If I do add up the mains that are 6 inch and larger I come up with the same number as the base year, 21,595. Could you please respond back to me to let me know what you would like me to do in the future.

If you have any questions or comments regarding the above please let me know. My e-mail is jimhalvorsen@cliftoncpa.com, my phone is 1-800-232-0596, and my fax is 715-387-3943.

~~Sorry its taken me this long to respond, we re busy trying to get the~~  
updated program out the door. With regards to the public fire protection  
calculation (item number 4), You are right, I did make an error in including  
the 3 inch mains in the calculation. Thanks for catching that. It looks  
like you are correctly calculating the charge. You may consider the review  
closed.

Thanks for your time.
